

THE FIRST NATIONAL BANK

OF SANTA FE.

The oldest banking institution in New Mexico. Established in 1870.
RUFUS J. PALEN, President. **JOHN H. VAUGHN, Cashier.**
HENRY L. WALDO, Vice President. **ALFRED H. BRODHEAD, Assistant Cashier.**

Capital \$150,000.

Surplus and Undivided Profits \$55,000.

Transacts a general banking business in all its branches. Loans money on the most favorable terms on all kinds of personal and collateral security. Buys and sells bonds and stocks in all markets for its customers. Buys and sells domestic and foreign exchange and makes telegraphic transfers of money to all parts of the civilized world on as liberal terms as are given by any money-transmitting agency, public or private. Interest allowed on time deposits at the rate of three per cent per annum, on a six month or year's term. Liberal advances made on consignments of live stock and products. The bank executes all orders of its patrons in the banking line, and aims to extend to them as liberal treatment in all respects, as is consistent with safety and the principles of sound banking. Safety Deposit boxes for rent. The patronage of the public is respectfully solicited.

OJO CALIENTE HOT SPRINGS.

These Celebrated Hot Springs are located in the midst of the Ancient Cliff Dwellers, twenty-five miles west of Taos, and fifty miles north of Santa Fe, an about twelve miles from Baranca Station on the Denver and Rio Grande Railway, from which point a daily line of stages runs to the springs. The temperature of these waters is from 90 to 122 degrees. The gases are carbonic. Altitude, 6,000 feet. Climate very dry and delightful the year round. There is now a commodious hotel for the convenience of invalids and tourists. These waters contain 1,686.24 grains of alkaline salts to the gallon, being the richest alkaline Hot Springs in the world. The efficacy of

these waters has been thoroughly tested by the miraculous cures attested to in the following diseases: Paralysis, Rheumatism, Neuralgia, Consumption, Malaria, Bright's Disease of the Kidneys, Syphilitic and Mercurial Affections, Scrofula, Catarrh, La Grippe, all Femal Complaints, etc., etc. Board, lodging and bathing \$2.50 per day; \$14 per week; \$50 per month. Stage meets Denver trains and waits for Santa Fe train upon request. This resort is attractive at all seasons and is open all winter. Passengers for Ojo Caliente can leave Santa Fe at 9 a. m., and reach Ojo Caliente at 4 p. m. the same day. Fare for round trip from Santa Fe to Ojo Caliente, \$7.40. For further particulars, address

ANTONIO JOSEPH, Proprietor.
 Ojo Caliente, Taos County, N. M.

SAN FRANCISCO STREET, SANTA FE

AN OPPORTUNITY FOR SMALL INVESTORS.

There is no surer or safer investment than good inside City Property, but it takes money to handle propositions like this, and the man with small capital is barred. Growing new towns, with conditions favorable to permanency afford an opportunity to the small investor to place his savings where his money will earn a handsome profit, equal in proportion to that of his more fortunate brother with larger means. This chance is offered at

WILLARD

THE GATEWAY

Which has all the things necessary for the building of a good, substantial town, including water of good quality, abundant in quantity at a depth of 35 feet below the surface, located in and tributary to the finest section of grazing country in the Southwest with agriculture in its infancy; as fine an all around climate as there is in the world, with a pushing, energetic class of citizens and two railroads, one the new A. T. & S. F. Short Line to the Pacific. Willard has made a most phenomenal growth and the price of lots will soon advance. Better come now. The townsite is owned by

Willard Town and Improvement Company.

JOHN BECKER, Pres. and Gen. Mgr.
 WM. R. BERGER, Secretary.

Call on or address JOHN W. CORBETT, Agent, Estancia, New Mexico. WILBUR A. DUNLAVY, Vice Pres.
 LOUIS C. BECKER, Treasurer.

Carl A. Dalles, Manager of The John Becker Co. Stores at Willard, has charge of the sale of lots in the absence of Mr. Corbett.

MINES AND MINING.

(Continued From Yesterday)

Silver.

At the present, silver mining offers attractions for investment that have not occurred during a dozen years previous. With improved methods of treatment, and with better transportation facilities, New Mexico should soon get back much of the old-time prestige she had before the metal was demonetized.

Many of the silver and gold ores are complex, and heretofore have defied profitable treatment. Since satisfactory methods have recently been put into operation, a large amount of ore (which up to this time could not be shipped) can now find a market.

Copper.

Western and southwestern New Mexico are rapidly becoming copper producers. A number of important developments have been made. As yet, the most important copper districts are at considerable distance from railway facilities. Lines of railroad have been located here during the past year; these tap a number of these camps. The Santa Rita mines continue to be good producers. In the Mogollon region, boronite ores (which occur in large deposits) are finding their way to the market in spite of transportation drawbacks.

The low grade copper ores of the great "Red Bed" belt have received attention. This formation covers large areas in New Mexico; nearly everywhere it carries more or less copper. In a small way, copper has already been extracted from the Red Beds. It is with much interest that large projected developments are being conducted.

Iron.

This has shown more activity than during the previous year. Ferro continues to be the largest producing camp; much of this output goes to Pueblo, Colorado. Important new bodies of iron ore have been lately discovered. The project of large rolling mills in New Mexico has not reached the stage where actual operation has begun. The past year has shown that iron is a much more important resource of the region than has hitherto been suspected.

Lead.

The mining of this metal has increased. The smelter at Deming has stimulated the local mining of lead. From the Granite Gap District, in Grant County, new developments have been made; the camp is now becoming an important producer. Another locality coming into prominence as a lead-sulphide camp is in the Caballos District, in Sierra County. The ore occurs in well defined veins. At the present, a large concentrating plant is being installed and a smelter is being provided. The camps in the Organ Mountains and in the Black Range have shown increased activity. In the Magdalena camp (which for the last twenty years has been a lead-carbonate producer, and which has been recently so overshadowed by zinc), immense sulphide bodies have been developed. The sulphide ores are a mixture of lead and zinc. A concentrator will soon make a rough separation of the former, which will be smelted on the spot; the ores containing zinc and a little lead at present are shipped to Joplin, Missouri, and Coffeyville, Kansas. New lead stoves have also been found at the top of the range; they promise important developments.

The search for the rare metals has made progress. Uranium in the form of the mineral torbernite has been found in Socorro County. New localities for tungsten have been found in Grant County. Molybdenite has been opened up in Santa Fe County.

Altogether the last year has been the most encouraging during the past decade.

Mine Inspector Jo E. Sheridan writes as follows on coal in New Mexico:

The production of coal in New Mexico in 1905, estimating the December short tons, this being the net quantity shipped from mines. The coke reported for the year was 85,000 short tons, shipped from ovens. The average value of the coal at mines was \$1.50, and of coke \$3.00 per short ton.

The number employed in mining, taking the average for the year, was 1,720 men and 60 boys underground; 460 men and 48 boys on the surface; a total of 2,388 persons. This gives an average of 699 tons of coal mined per employee. The number of persons killed by accident during the year was

5, an average of 2.185 per 1,000 employed.

In addition to the foregoing persons engaged in the actual mining of coal, an average of 300 men has been employed in construction work.

(To Be Continued Tomorrow)

ULCER OF THE STOMACH.

Insidious Nature of the Disease—How to Recognize and Cure It.

Ulcer of the stomach may exist for years without very marked symptoms, excepting those caused by indigestion.

In good health, the stomach resists the action of the gastric juices, but when weakened, the membrane is badly nourished and the digestive fluids act upon it as well as upon the food, keeping up until perforation of the stomach occurs. In advanced cases of ulcer of the stomach there is much discomfort after eating, with a constant gnawing sensation between meals, pain from the pit of the stomach back to the shoulder blade.

At the first symptoms of indigestion, treatment should at once be started with M-O-N-A. This is a scientific remedy adapted specifically to one purpose the cure of stomach troubles. It is so uniformly successful that A. C. Ireland gives a signed guarantee with every 50 cent box that the money will be refunded if it does not cure.

WESTERN LIVE STOCK SHOW.

Denver, Colo., Jan. 29th to Feb. 3rd. For this occasion the SANTA FE will sell tickets to Denver and return at one fare plus \$2, (\$18.90) for the round trip. Dates of sale January 27, 28 and 29, return limit February 15, 1906.

H. S. LUTZ, Agent.

Chamberlain's Cough Remedy the Best Made.

"In my opinion Chamberlain's Cough Remedy is the best made for colds," says Mrs. Cora Walker of Porterville, California. There is no doubt about its being the best. No other will cure a cold so quickly. No other is so sure a preventive of pneumonia. No other is so pleasant and safe to take. These are good reasons why it should be preferred to any other. The fact is that few people are satisfied with any other after having once used this remedy. For sale by all druggists.

Small Holding Claim No. 2620.

NOTICE OF PUBLICATION.
 Department of the Interior, United States Land Office, Santa Fe, N. M., Jan. 16, 1906.

Notice is hereby given that the following named claimant has filed notice of his intention to make final proof in support of his claim under Sections 16 and 17 of the Act of March 3, 1891 (26 Stats., 854), as amended by the Act of February 21, 1893 (27 Stats., 470), and that said proof will be made before the Register or Receiver at Santa Fe, N. M., on the 23rd day of February, 1906, viz:

Pancrazio C. DeBaca for the S. H. C No. 2620, situated in Sec. Nos. 5 and 8, T. 13 N., R. 9 E. He names the following witnesses to prove his actual continuous adverse possession of said tract for twenty years next preceding the survey of the township, viz: Jose Padilla, Santa Fe, N. M.; Andres C. DeBaca, Santa Fe, N. M.; George Trujillo, Galisteo, N. M.; Jose N. Gonzales, Galisteo, N. M.

Any person who desires to protest against the allowance of said proof, or who knows of any substantial reason under the laws and regulations of the Interior Department why such proof should not be allowed will be given an opportunity at the above mentioned time and place to cross examine the witnesses of said claimant, and to offer evidence in rebuttal of that submitted by claimant.

MANUEL R. OTERO,
 Register.

Homestead No. 6565.

NOTICE OF PUBLICATION.
 Department of the Interior, Land Office at Santa Fe, N. M.

January 6, 1906.

Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before the register or receiver at Santa Fe, N. M., on February 14th, 1906, viz:

Juan Ortiz for the lots 6 and 7, section 1, lot 1 and 2, section 12, T. 12 N., R. 8 E.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz:

Ambrosio Pino, Silvester Davis, Porfirio Lucero, all of Galisteo, N. M.; R. B. Willison, of Santa Fe, N. M.

MANUEL R. OTERO,
